

SULTRASPOT COLOUR

Pre-wash and post-wash stain remover for removing tannin stains

Application

SULTRASPOT COLOR is an acidic stain remover used for removing tannin and pigment stains from clothes

Properties

- SULTRASPOT COLOR is a water-based product.
- The following stains can be removed with SULTRASPOT COLOR: tea, coffee, grass, wine, fruit, etc.
- SULTRASPOT COLOR can be used safely on almost all fabrics.

Use instructions

- For best results, apply SULTRASPOT COLOR undiluted to the stain before cleaning.
- Gently work in the product with a scrubbing brush (do not rub!), so that the product has time to work.
- **Rinse** out the stain with a stain-remover gun and water.
- If the stain is still visible, repeat the procedure – if necessary, multiple times.
- **Blow the stain dry** with compressed air and clean the garment in the cleaning machine with the usual cleaning program for the garment.
- If the origin of the stain is not known, first use **SULTRASPOT PROTEIN** on it, to prevent protein stains from becoming fixed and non-removable.
- Because SULTRASPOT COLOR is a concentrated product with a low pH, it is important to take care with sensitive (bright) colours such as red, blue, brown and green. In addition, take care with linen fibres as these can very easily lose colour. In case of doubt, first **test on a hem**.

Physico-chemical properties

- Density : 1,03
- pH (100%) : 2,7
- Solubility in water : soluble

Composition & Safety

Anionic surfactants 5%

Meets European directives on the classification, packaging and labelling of dangerous chemical substances and preparations.

Storage

Use above 5°C. Store above 0°C

Packaging

Canister 9 kg
