

Laundry TarGo®

LAUNDRY OILY
STAIN REMOVER

Laundry TarGo®

An environmentally friendly water-base spotter that removes oil-based stains in the laundry as well as in wetcleaning or on the spotting board. Laundry TarGo works on even the toughest oil-based stains and can safely be rinsed down the drain.

When drycleaning with Perc, use TarGo® Dry to remove oily stains. When drycleaning with alternative solvents, use TarGo® EF.

DIRECTIONS

Before using Laundry TarGo, read and understand the Laundry TarGo Safety Data Sheet available from your Wilson distributor or from Wilson direct.

After Washing:

Apply Laundry TarGo directly to stain. Wait at least one hour. (For best results, leave overnight.) Wash in usual manner.

On Fresh Stains, Before Washing:

Apply Laundry TarGo directly to stain. Work in thoroughly. Rinse. On tough stains, several applications may be needed. Rinse after each application. If any stain remains, re-apply Laundry TarGo, leave overnight, then wash in usual manner.

Your customers want you to return their laundered garments like new. That calls for the effective, safe stain removal you'll get with Laundry TarGo. Use it to remove even the tough oil-base stains others leave behind.

*Laundry TarGo®
You can count on it.*
